

Pipeline Manager – Job Description

Whangarei

About the role

We are seeking a proven Pipeline Manager with at least 10 years working in oil & gas industry to lead safe and reliable pipeline operation and compliance.

- Ensure safe and reliable operation and compliance of Channel's fuel pipeline
- Great team environment in a great location
- Excellent remuneration with plenty of benefits

In particular, you will:

- Own the Pipeline Safety and Operating plan.
- Provide pipeline compliance oversight and technical advice.
- Take ownership of the Integrity Management System and direct and grow maintenance strategies.
- Build strong relationships with regulators, pipeline certifiers, emergency services, lifelines groups and landowners.
- Administer contracts and manage the OPEX budget.
- Provide incident response leadership if required.

About you

As our Pipeline Manager you will have:

- A tertiary engineering qualification.
- At least 10 years oil & gas pipeline experience.
- Experience in working with AS2885.3 and other applicable codes.
- A working knowledge of APGA Competency Standards as applied to pipeline engineers.
- Solid project and contract management skills.
- Sound communication skills with proven experience working with regulatory bodies, councils and members of the public

You will need to be versatile, an excellent communicator, with a safety focus, who pays attention to the details (and legislative requirements).
